A CRY FROM THE WOMB

Healing the Heart of the World

***A guide to healing and helping Souls return to the Light
after sudden death, miscarriage, stillbirth or abortion***

By Gwendolyn Awen Jones

This book will change your life forever and the lives of generations to come.

Medical intuitive and healer, Gwendolyn Awen Jones brings us astounding information about the spiritual awareness of the incoming child from the moment of conception. She shows that a child's soul can be spoken to and helped throughout a pregnancy. She explains that in the event of a sudden death the soul should be assisted back to the light for the health of all concerned *especially after miscarriage, stillbirth or abortion*. Through stunning case histories Jones shows why parents may suffer long after the death of a child and provides the necessary understanding to assist healing.

English author, Jones has had the gift of spiritual sight since childhood and can see all levels of the human energy field. This has helped her diagnose conditions in clients who have had various illnesses that doctors had not been able to heal. She has found that illness can relate directly to the loss of a child, even if that child was lost many years ago. In the event of a difficult death, a child's soul may remain entangled in the energy field of the mother or father if the soul has not been safely guided back to the light. This is particularly true with abortions, miscarriages and stillbirths as often no transitional rites have been done. Emotional cords from the grieving parents can hold the child's soul back depleting all concerned, causing depression, cancer, or even suicide attempts in the parents if not resolved with healing and prayer. Case histories provide insights into the wounding at all levels caused by these losses and the healing that should be done to balance parents and help the child's soul during this critical time.

Jones provides proof of the awareness of the incoming child's spirit even in the early days of gestation. Just as those who have near death experiences can see and hear the world through the eyes of their spiritual body, so it is with the unborn child. Jones explains a woman should gently and lovingly speak with the spirit of her child at all times. Her research shows that negative thoughts and emotions during pregnancy can have a devastating impact on the child's growth in the womb. A loving environment helps a mother bring in children of greater spirituality and intelligence. In the event that the timing of a pregnancy is not appropriate, understanding that the child has an intelligent spirit and asking the child's spirit to reconsider is a far gentler approach than abortion. The child's spirit *can* choose to withdraw.

Prayers are included in the back of the book for healing all involved and to assist the transition of all souls.

As each family heals their hearts, the Heart of the World heals also.
